Story of My Life

I am Brianna Marie Quillin, and this is my life; I will be talking about my family, school, my struggles, and my goals for the future.

Backstory:

I was born on January 9, 2000 to Rob and Michelle Quillin, in South Haven, Michigan. I was not born in a hospital, my mother decided to have a homebirth. By eight months we moved to Kalamazoo, Michigan into a house that we still reside in. Growing up, my mother was a stay-at-home mom, and my father owned his own construction business; we lived close to my grandparents so we would go visit them at least once a week. When I was four years old my parents had my sister Samantha Ann Quillin; she was born on March 24, 2004, and then they had my youngest sister Gabrielle Rose Quillin on June 5, 2006. Growing up my mom was my inspiration; she stayed home with us, but after Gabriella was born she went back to work. My parents later got a divorce in 2012, after that my mom was the sole person taking care of us. She is my inspiration because no matter what she takes care of us.

School/Work:

Growing up I was an art kid, until I took a business class in high school at Portage Northern; I instantly fell in love with it. I took three Education for Employment (EFE) classes in high school, Business Management and Administration, Accounting, and Marketing. EFE classes are college-level classes you can take in high school. I do

not participate in any extracurricular activities because I believe my job is to focus on school. I am currently looking for a job; my last one was for Property Solutions of Michigan, a lawn care company. We mowed all of the Kalamazoo Public elementary and middle schools, and performed landscaping.

Individual:

The major struggle was that I went through was my parents divorce; when they separated, I became depressed. My mother sent me to four different therapists since then, and I was put on two different kinds of medication. I thought I would be dependent on it my whole life, but now I realize I am in control. I no longer go to therapy and take medications because I am the one who controls me, not my mental illness. My biggest accomplishment is making honors all four years of high school. I may of had some ups and downs, my GPA decreased, but I still made it, and this June I will walk with tassels.

Future:

Where do I see myself in five years? I hope to be graduated from college with my doctorate in accounting, and be working in a big firm, making lots of money. I would like to be married to my soulmate, or at least have found him. In ten years, I hope to still have the job at the firm, maybe having moved up in the branch. I will have two kids and a dog; I would like to travel with my family, maybe go to Europe, or some caribbean island. I would like to live in either Tennessee or Colorado, somewhere secluded with lots of land.

I hope you have learned something new about me, and that I wasnt too boring, that is my life and my dreams.
